Authorization for this examiner's amendment was given in a telephone interview with Mr Ralph A. Dowell on September 26, 2007.

The application has been amended as followed:

Claim 1, Lines 6 - 7, "*a phase error detector for estimating errors in real and imaginary components of said digital signal*" has been deleted.

Claim 1, Lines 16 - 17, "*said fine carrier recovery circuit comprising a filter for filtering **an** estimate of a phase error in said carrier to control said phase correction....*" has been replaced by "*said fine carrier recovery circuit comprising **a phase error detector for estimating errors in real and imaginary components of said digital***

signal, a filter for filtering ~~the~~ estimate of phase error in said carrier to control said phase correction...."

Claim 25, Lines 13 - 16, "*wherein said determining an estimate of a phase error is performed by estimating errors in an imaginary component of said signal uniquely in each of two modes, and wherein a first of said two modes is for high quality signals*", has been deleted.

Claim 25, Line 6 (*determining an estimate of a phase error in said **carrier***), has been replaced by "*determining an estimate of a phase error in said **signal, performed in two modes by estimating errors in an imaginary component of said signal uniquely in each of two modes, and wherein a first of said two modes is for high quality signals***",

Allowable Subject Matter

Claims 1 – 14 and 18 - 47 are allowed.

The following is an examiner's statement of reasons for allowance:

two modes of operation for uniquely estimating errors in the imaginary component of the digital signal and wherein a first of said two modes is for high quality signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
